About Me

I am a finance and data science professional currently focused on learning and developing AI models to support financial and stock market decision-making. I aim to apply these tools to produce more accurate and meaningful analyses.

Skills

- Technical Analysis of Financial Markets
- Data Analysis with Python
- Managerial and Leadership Skills
- IA and Machine Learning
- Power BI
- Angular/PHP/JAVA/Python
- Agile Scrum
- AMIB Figura 3

Experience

Senior Consultant / Liverpool / September 2024 - November 2025

- Automation in the extraction and cleaning of data from SAP and web pages, saving up to 2 hours per day in obtaining the data
- Development of an intranet with Angular and Python for the automation of financial and reporting processes.
- Preparation of budgets focused on ensuring an optimal allocation of resources across departments and improving the effectiveness of annual spending.
- Team management, as well as increasing team retention and satisfaction through actions aimed at improving the work environment.

Coppel / Full Stack jr. / June 2022 - June 2024

- Frontend development with Angular and TailwindCSS to improve user experience, and use of PHP and Spring Boot on the backend for greater efficiency in data handling, migrating legacy programs to enhance accessibility and user experience.
- Development and maintenance of desktop applications using C++
- Data manipulation with PostgreSQL and MySQL to ensure information integrity and availability.

Academic Background

Universidad del Valle de México/ Sep 2023 - Aug 2025

- Master's in Engineering with a Focus on Data Science and AI

Universidad Tecmilenio / Jul 2017 - Jul 2021
